### **PRE-INSTALLATION CHECKS**

- ❗ Unpack & check the item is correct & no damage has occurred during transit.
- ❗ If there are any visible defects **DO NOT PROCEED WITH THE INSTALLATION & please contact the place of purchase immediately. ANY CLAIMS FOR DAMAGE WILL NOT BE ACCEPTED AFTER INSTALLATION.**
- ❗ Protect your bath before & during installation, scratches &/or cracks &/or surface damage sustained during or after the installation are not covered by warranty.
- ❗ Installation must be in accordance with building regulations & local authority requirements.

## INSTALLATION STEPS

### STEP 1.

Remove your freestanding bath from the box. Check for damage and ensure your bath does not come in contact with any rough surfaces which may scratch your bath. Place your freestanding bath on cardboard or carpet during installation. Place the freestanding bath in the correct position for installation.

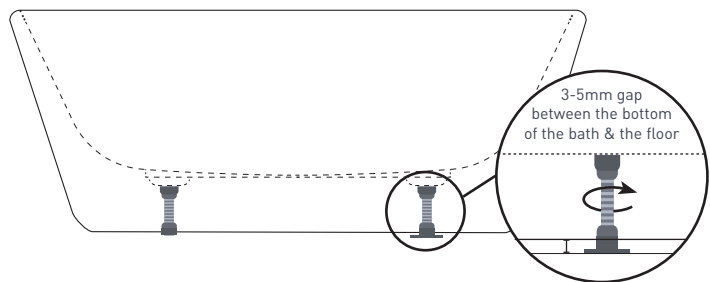

### STEP 2.

Adjust the leveling feet until the bath base is 3-5mm above the finished floor. If measuring from the unfinished floor take into account the floor finishing thickness (such as tiles) into account. Turn the feet bolts and level accordingly.

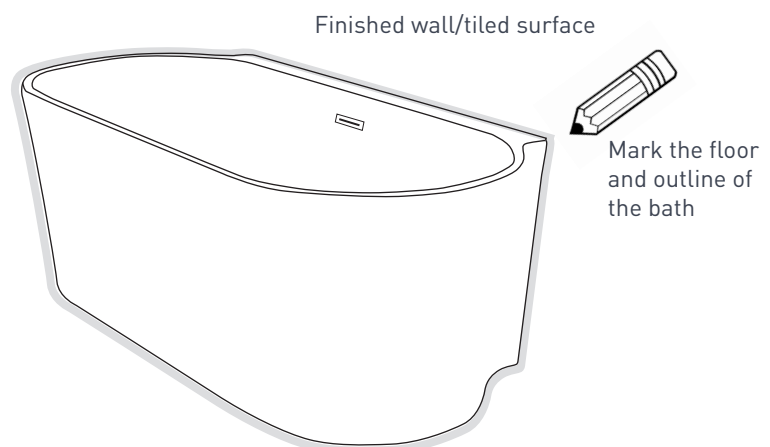

Ensure there is 3-5mm of space between the bottom of the bath shell and the floor. Installing directly on the floor will place pressure on the outside wall of the bath and will potentially crack the bath.

Ensure the bath is level so all water can drain to the waste outlet.

### STEP 3.

Mark the desired position of the bath on the floor and the outline on the wall.

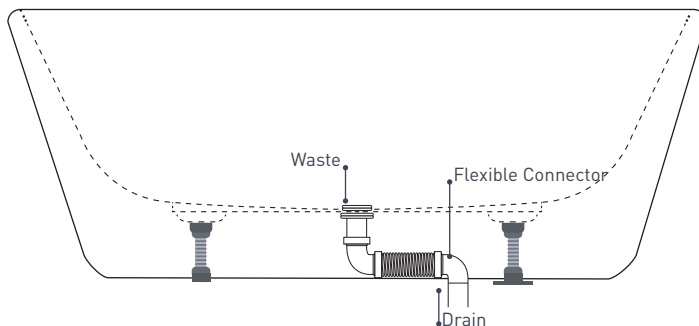

## INSTALLATION STEPS

### STEP 4.

Carefully tilt the bath on its side and connect it to the drain outlet. We recommend using a Decina Flexible Connector.

Ensure the Flexible Connector is cut to the correct length for easier installation and to prevent drainage issues.

Before finishing, water test for leaks and correct drainage. Fill the freestanding bath with water and check the water flows easily to the waste outlet. A small amount of residual water may be present due to surface tension.

**OWA004 Decina Flexible Connector + Pop-Up Waste**

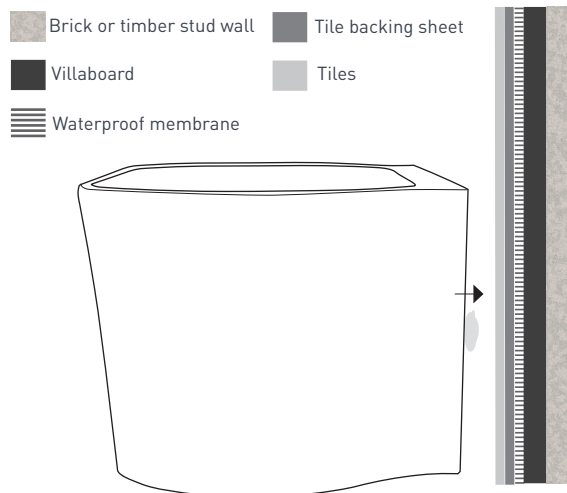

Min. clearance 100mm

**OWA005 Decina Flexible Connector** Min. clearance 80mm

**PLEASE NOTE:** A flexible bath connector cannot be used with Aurora 1500mm bath. Connect the waste directly to the drain.

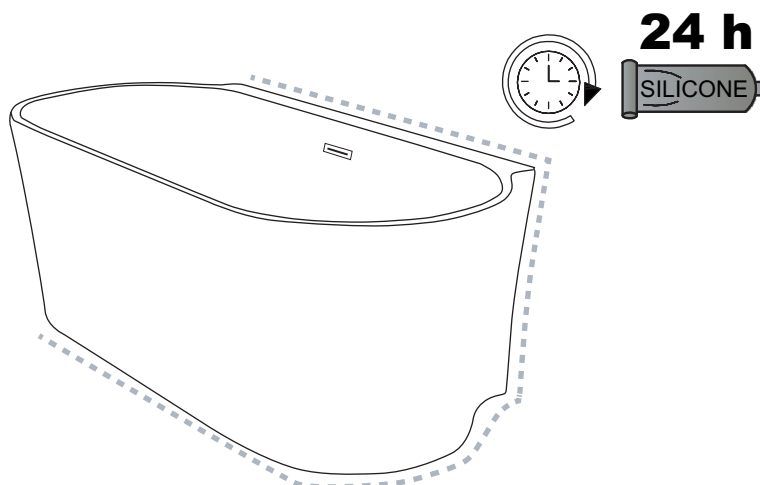

### STEP 5.

Apply silicon to the back of the bath and slide the bath flush up against the bathroom wall. Installation must comply with local authority regulations and building codes.

### STEP 6.

Apply silicone around the bath outline and allow it to set for a minimum of 24 hours.

- ❗ After using your bath, clean with a soft cloth & warm soapy water to clean any oils or soap, to prevent tide marks & preserve the matte surface.
- ❗ Clean using warm soapy water & only mild liquid detergents. do not use powders, pastes, creams, chemicals, window cleaning sprays or abrasive cleaners.
- ❗ Before using coloured essential oils or bath salts, test for staining in an inconspicuous place. Always add oil or bath salts to full bath of water.
