NATALIA BACK-TO-CORNER FREESTANDING BATH INSTALLATION & OWNER GUIDE

Thank you for purchasing a Decina Natalia Freestanding Corner Bath.

This manual provides the correct steps and care advice for a safe and long lasting installation.

Manufactured from premium sanitary grade acrylic, the Natalia freestanding back-to-corner bath is easy to install with adjustable self-supporting feet. The back to corner design allows it to be built into corner walls providing a water tight seal around the bath rim. Left & right corner options available.

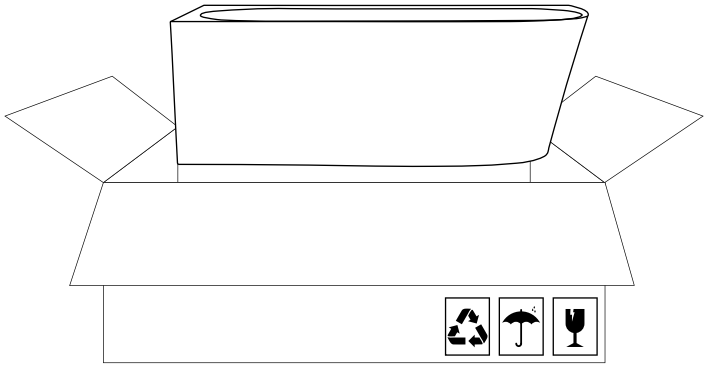
PRE-INSTALLATION CHECKS

- Unpack & check the item is correct & no damage has occurred during transit.
- If there are any visible defects DO NOT PROCEED WITH THE INSTALLATION **&** please contact the place of purchase immediately. **ANY CLAIMS FOR DAMAGE WILL NOT BE ACCEPTED AFTER INSTALLATION**.
- Protect your bath before & during installation, scratches &/or cracks &/or surface damage sustained during or after the installation are not covered by warranty.
- Installation must be in accordance with building regulations & local authority requirements.

STEP 1.

Remove your freestanding bath from the box. Check for damage and ensure your bath does not come in contact with any rough surfaces which may scratch your bath. Place your freestanding bath on cardboard or carpet during installation. Place the freestanding bath in the correct position for installation.

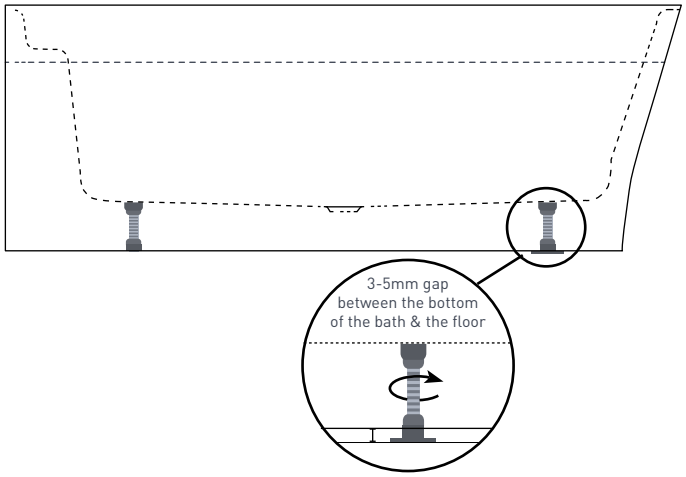


STEP 2.

Adjust the leveling feet until the bath base is 3-5mm above the finished floor. If measuring from the unfinished floor take into account the floor finishing thickness (such as tiles) into account. Turn the feet bolts and level accordingly.

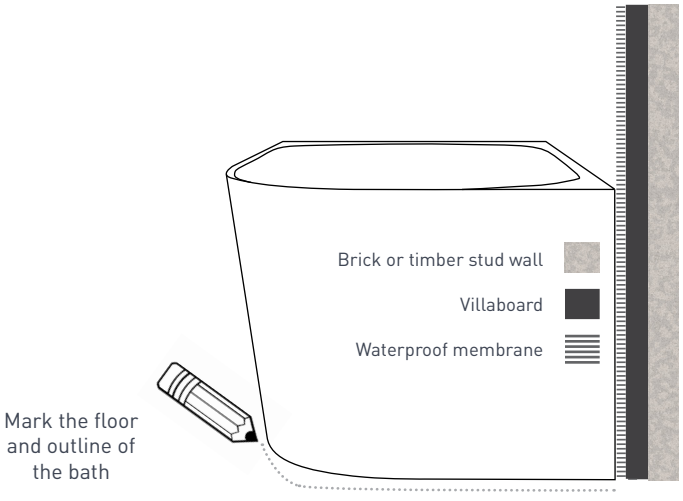
Ensure there is 3-5mm of space between the bottom of the bath shell and the floor. Installing directly on the floor will place pressure on the outside wall of the bath, and will potentially crack the bath.

Ensure the bath is level so all water can drain to the waste outlet.



STEP 3.

Mark the desired position of the bath on the floor with an outline. Finish flooring.

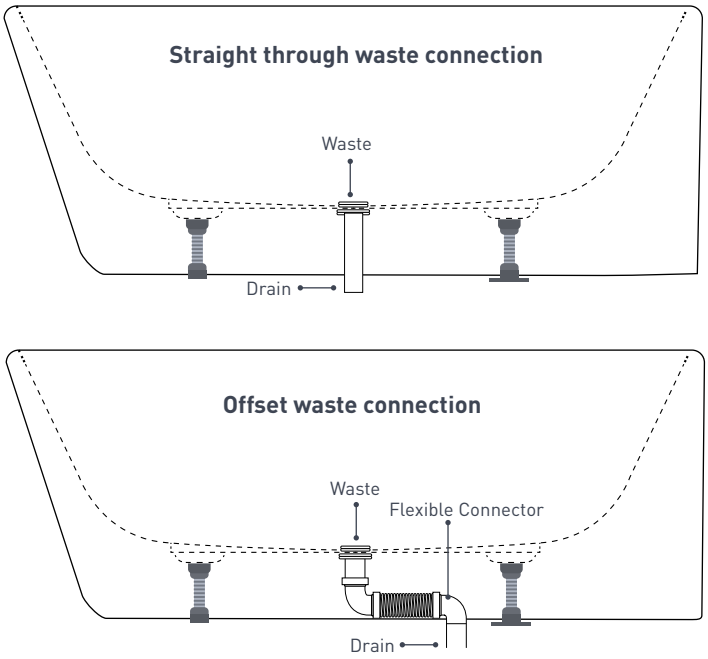


STEP 4.

Carefully tilt the bath on its side and connect it to the drain outlet if a straight through connection is available. If your waste is offset, we recommend using a Decina Flexible Connector, connect the waste directly to the drain.

Ensure the Flexible Connector is cut to the correct length for easier installation and to prevent drainage issues.

Before finishing, water test for leaks and correct drainage. Fill the freestanding bath with water and check the water flows easily to the waste outlet. A small amount of residual water may be present due to surface tension.

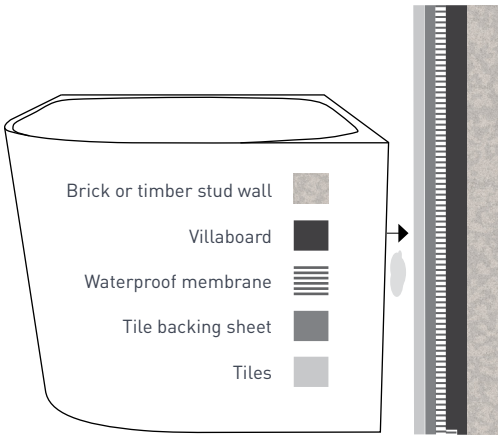


OWA004 Decina Flexible Connector + Pop-Up Waste Min. clearance 100mm
OWA005 Decina Flexible Connector Min. clearance 80mm

STEP 5.

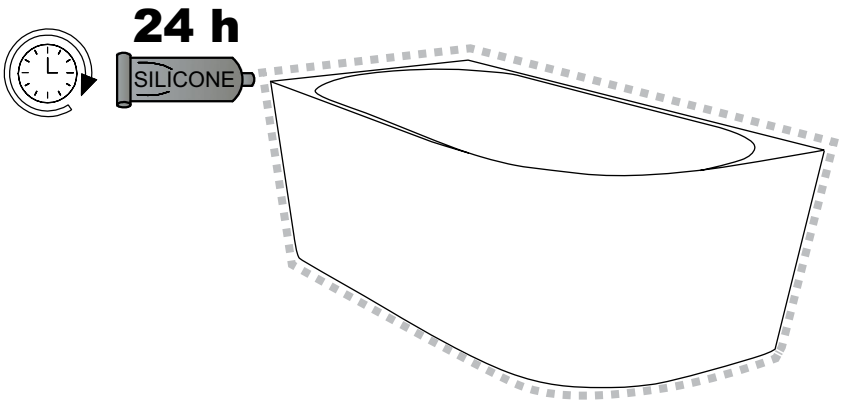
Apply silicon to the back and corner side of the bath and slide the bath into the wall cavities (as detailed in Step 3).

Finish tiling and grouting the wall around the bath. Installation must comply with local authority regulations and building codes.



STEP 6.

Apply silicone around the bath outline and allow it to set for a minimum of 24 hours.



MAINTENANCE

DECINA USES THE HIGHEST SANITARY GRADE ACRYLIC, HOWEVER NAKED FLAMES, CIGARETTES OR STRONG CHEMICALS SHOULD BE AVOIDED & REMOVED IMMEDIATELY TO PRESERVE THE HIGH GLOSS ACRYLIC SURFACE:

- When filling the bath start with cold water to allow the bath to gradually adapt to the temperature.
- After using your bath clean with a soft cloth & warm soapy water to clean any oils or soap, to prevent tide marks & preserve the polished surface.
- Clean using warm soapy water & only mild liquid detergents. do not use powders, pastes, creams, chemicals, window cleaning sprays or abrasive cleaners.
- Cream cleaners may only BE USED to remove stubborn marks.
- Scratches can be removed with a fine polish like Brasso.
